International Journal of Fracture

CONTENTS OF VOLUME 110 (2001)

Vol. 110, No. 1, 2001

Three-dimensional mixed mode analysis of a cracked body by fractal finite element method	R.K.L. SU and A.Y.T. LEUNG	1–20
Simulation of ductile crack growth in thin aluminum panels using 3-D surface cohesive elements	Y. ARUN ROY and ROBERT H. DODDS JR.	21–45
Failure mode transition speeds in an impact loaded prenotched plate with four thermoviscoplastic relations	R.C. BATRA and N.A. JABER	47–71
The interaction of multiple rows of periodical cracks	GENG SUN WANG and XIA TING FENG	73–100

Vol. 110, No. 2, 2001

Small scale geometric and material features at geometric discontinuities and their role in fracture analysis	MARTIN L. DUNN, C.Y. HUI, PAUL E.W. LABOSSIERE and Y.Y. LIN	101–121
Stress intensity factors around a crack in a nonhomogeneous interfacial layer between two dissimilar elastic half-planes	S. ITOU	123–135
Boundary element analysis of interface cracks subjected to nonuniform thermal loading	YEN-LING CHUNG, CHUANG-YU CHANG and CHYOU-CHI CHIEN	137–154
The elastic stress fields of elliptic and tapered cracks with predefined shapes	S. MAALØE	155–173
Mixed-mode fracture analyses of plastically-deforming adhesive joints	Q.D. YANG and M.D. THOULESS	175–187
The surface crack problem for a layered plate with a functionally graded nonhomogeneous interface	S. UEDA	189–204

Vol. 110, No. 3, 2001

Uniform asymptotic approximations for accurate modeling of cracks in layered elastic media	ANTHONY P. PEIRCE and EDUARD SIEBRITS	205–239
A fracture evolution procedure for cohesive materials	S. MARFIA and E. SACCO	241–261
Weight functions for interface cracks in dissimilar anisotropic piezoelectric materials	LI-FENG MA and YI-HENG CHEN	263–279
Influence of threshold parameters on cleavage fracture predictions using the Weibull stress model	CLAUDIO RUGGIERI	281–304

Vol. 110, No. 4, 2001

Thermal singular stresses of glass-fiber reinforced plastics with surface cracks at cryogenic temperatures	S. UEDA	305–323
Interface cracks in layered materials subjected to a uniform temperature change	F.G. GAUDETTE, A.E. GIANNAKOPOULOS and S. SURESH	325–349
A cohesive model of fatigue crack growth	O. NGUYEN, E.A. REPETTO, M. ORTIZ and R.A. RADOVITZKY	351–369
Straight-sided, buckling-driven delamination of thin films at high stress levels	HENRIK MYHRE JENSEN and IZHAK SHEINMAN	371–385
A new boundary element method for mixed boundary value problems involving cracks and holes: Interactions between rigid inclusions and cracks	Y.B. WANG and K.T. CHAU	387–406
Volume contents		407–408
Author index		409
